NET is Taxable Value / Sub Total. Never Order Total.

Part 2 — Frozen closed years

These are immutable. Any deviation means something wrote to a frozen year.

FY	Rows	Total Rs Cr	State
FY2023-24	137,619	349.02	frozen
FY2024-25	141,201	341.14	frozen
FY2025-26	145,613	361.00	frozen

FY2025-26 is Rs 361.00 Cr. The older Rs 359.52 Cr figure came from a stale xlsx that was 1,248 rows short. Rs 361.00 Cr sits Rs 0.14 Cr from the State Head Sale anchor of Rs 361.14 Cr.

Startup assertion: if any frozen year's row count or total changes, fail loudly with the year named.

Part 3 — FY2026-27 primary sale / dispatch

Month	Rows	Invoices	Customers	Codes	Quantity	Rs Cr
Apr-26	5,542	1,012	214	1,713	1,569,677	13.11
May-26	11,812	2,408	292	2,428	4,607,661	28.28
Jun-26	12,868	2,282	296	2,499	5,602,739	31.43
Jul-26	11,454	1,958	293	2,473	5,254,611	25.90
Total	41,676	7,660	500	3,654	17,034,688	98.71

Aug-26 holds zero rows in the register as at 1 August.

Periods

Period	Rows	Rs Cr
Q1 (Apr–Jun)	30,222	72.81
Q2 (Jul only)	11,454	25.90
YTD (Apr–Jul)	41,676	98.71

Part 4 — FY2026-27 primary order booking

Month	Rows	Orders	Customers	Codes	Quantity	Rs Cr
Apr-26	6,694	630	231	1,992	1,840,266	15.73
May-26	11,842	1,016	278	2,450	4,816,124	29.37
Jun-26	13,311	1,153	299	2,633	5,943,338	32.65
Jul-26	13,812	1,308	325	2,603	6,943,554	32.56
Total	45,659	4,107	519	3,790	19,543,282	110.32

Pending — order booking minus dispatch

Month	OB Rs Cr	Sale Rs Cr	Pending Rs Cr
Apr-26	15.73	13.11	2.63
May-26	29.37	28.28	1.09
Jun-26	32.65	31.43	1.23
Jul-26	32.56	25.90	6.66
YTD	110.32	98.71	11.60

Pending must never be negative. A negative value means dispatch exceeds what was ever ordered, which is impossible and indicates the sale side is inflated.

Part 5 — FY2026-27 sale by State Head

Note: the register uses the OLD head vocabulary — SANDEEP JI, RIZVI JI, BIJJU, LALAN, NASIR HUSAIN, PAWAN KUMAR. Five of these are merged to current names in head_canon. PROJECT, GOVT, GEM, JJM and OTHER are non-territory channels.

State Head (register name)	Apr	May	Jun	Jul	Total Rs Cr	Share
SANDEEP JI	6.24	13.07	18.63	13.87	51.80	52.5%

Periods

Period	Plan	OB	Sales	Achievement
Q1 (Apr–Jun)	Rs 82.60 Cr	Rs 57.70 Cr	Rs 62.86 Cr	76.1%
YTD (Apr–Jun)	Rs 82.60 Cr	Rs 57.70 Cr	Rs 62.86 Cr	76.1%

Annual columns: plan (L) Rs 365.38 Cr · OB (M) Rs 57.70 Cr · sales (O) Rs 63.20 Cr · Total Dealer (K) 11,536

Secondary YTD stops at June, because July has a plan of Rs 26.02 Cr and effectively no recorded actuals. Including July would drop achievement from 76.1% to 57.9% — a fall caused entirely by a month with no data. Primary YTD runs to July; secondary to June. Each card must state its own range.

Months from Aug onward carry a plan and zero actuals. They must read "no actuals recorded yet", never 0%, and must not contribute a low-performer count.

The plan declines month on month — Rs 28.77 Cr in June against Rs 16.78 Cr in October — and the count of members with a plan falls from 137 to 68. Never pro-rate an annual target evenly across months.

Part 9 — Cross-checks that must hold

#	Check	Expected
1	Apr + May + Jun sale	Rs 72.81 Cr
2	Apr–Jul sale	Rs 98.71 Cr
3	Apr–Jul order booking	Rs 110.32 Cr
4	Pending = OB - sale	Rs 11.60 Cr , never negative
5	Secondary Q1 OB	Rs 57.70 Cr
6	Secondary Q1 sales received	Rs 62.86 Cr
7	Secondary Q1 achievement	76.1% = 62.86 ÷ 82.60
8	Monthly sale sums to YTD	13.11 + 28.28 + 31.43 + 25.90 = 98.72
9	Monthly OB sums to YTD	15.73 + 29.37 + 32.65 + 32.56 = 110.31
10	SOBR col O annual vs monthly	Rs 63.20 Cr vs Rs 62.86 Cr — Rs 0.34 Cr is July's partial entry
11	Frozen FY2023-24	137,619 rows · Rs 349.02 Cr
12	Frozen FY2024-25	141,201 rows · Rs 341.14 Cr
13	Frozen FY2025-26	145,613 rows · Rs 361.00 Cr

A frozen year that moves, or a negative pending, is a fault — not drift.

Part 10 — Row-count anchors

Source	Month	Rows
Sale Sheet	Apr-26	5,542
Sale Sheet	May-26	11,812
Sale Sheet	Jun-26	12,868
Sale Sheet	Jul-26	11,454
Order Sheet	Apr-26	6,694
Order Sheet	May-26	11,842
Order Sheet	Jun-26	13,311
Order Sheet	Jul-26	13,812
SOBR	member rows	162
Dashboard Data	member rows	183

Row counts are the fastest fault detector. A month whose DB row count exceeds the sheet is inflated; fewer means rows were dropped. Both have happened.

Part 11 — Currently known deviations

Figure	App	Source	Diff
Jul sale	Rs 27.36 Cr	Rs 25.90 Cr	+1.46
YTD sale	Rs 100.17 Cr	Rs 98.71 Cr	+1.46
Pending	Rs 10.15 Cr	Rs 11.60 Cr	-1.45
OB Primary YTD	Rs 110.32 Cr	Rs 110.32 Cr	exact

One fault, three symptoms. YTD includes July; Pending is OB minus sale, so it is understated by exactly what sale is overstated. The Order Sheet path is clean.

July read Rs 41.26 Cr earlier on 1 August and Rs 27.36 Cr later, so a partial cleanup ran — **but stopped Rs 1.46 Cr short.** The July DB row count should be **11,454**.

Part 12 — How to use this

Row counts first. They are unambiguous and catch both inflation and loss.

Then monthly values, which localise a fault to one month.

Then the cross-checks in Part 9, which catch faults that survive both — a wrong period range, a mislabelled card, a negative pending.

Then the dimensional breakdowns in Parts 5 to 7, which catch attribution faults: a head merged wrongly, a segment derived from the wrong column, a state variant not normalised.

Re-read the source before treating any difference as a bug. The live sheet moves during the day — one member's sale shifted Rs 6.5 lakh in a few hours on 30 July. Compare at the same moment, and record the read timestamp alongside every figure.
