

# SKU Deep Dive — Glossary & Calculations

Prayag India Sales Intelligence — glossary, calculations & logic · generated 2026-08-01

## SKU DEEP DIVE GLOSSARY

### K1: Catalogue & Facts

- Segment: Highest-level SKU grouping. Derived from group\_canon (curated) or group\_raw (ERP) from sale\_line\_current. "Unmapped" if both are null.
- Item Code / SKU: The unique product identifier.
- Net Value: Primary sales metric (amount) after returns/discounts.
- SKU Breadth: Count of distinct item codes bought by a customer in a period.
- Segment Breadth: Count of distinct segments bought by a customer.
- Ever Sold: Denominator for segment penetration; count of unique SKUs within a segment sold to any customer in the selected FY.

### K3: Review + Push Lists

- Peer Cohort: A group of distributors in the same Net Value quintile.
- Quintile: Distributors ranked by total Net Value in FY2025-26 (COHORT\_FY). 1 = Top 20%, 5 = Bottom 20%.
- State Cohort: Peers within the same state\_canon (normalised to handle splits like "DELHI A" and "DELHI NCR").
- National Cohort: Fallback used if a state has <8 distributors.
- Peer Count (Signal): Number of cohort peers buying a specific SKU that the target distributor does not buy.
- Recommendation Tiers:
  - Tier 1 (Range): Filling a gap in an item\_group the distributor already buys.
  - Tier 2 (Lapsed): SKU bought in COHORT\_FY but not in the current period.
  - Tier 3 (Active): SKU in a segment where the distributor is currently active.
  - Tier 4 (New): SKU in a segment where the distributor has zero current purchases.

### K4: Discounts & Trends

- Primary MRP Discount:  $1 - (\text{Net} / (\text{MRP} * \text{Qty}))$ . Calculated per row using item\_master.mrp.
- Secondary Register Discount: The discount\_pct column from secondary\_sku\_line (retailer level).
- Norm Discount: The average territory-wide discount for a SKU across closed FYs (23-24, 24-25, 25-26).
- Above-Norm Flag: Highlighted if a SKU's current period discount is  $\geq 5$  percentage points higher than its Norm Discount.
- First Order: A SKU purchase where the (Customer, Code) pair has no history in any prior FY.
- Lost Code: A SKU bought by an active customer in the prior FY but missing in the current FY.
- Breadth Narrower: A customer whose distinct SKU count has dropped vs the prior FY.

---

## CALCULATIONS & LOGIC

### 1. Peer Cohort Logic (K3)

- Membership: Peers = Same Quintile  $\pm 1$  (e.g., Quintile 2 sees peers in Q1, Q2, Q3).
- Territory Only: Project/Govt entities (identified via head\_canon = 'Non-territory / Project / Govt') are strictly excluded from cohorts.
- Min Thresholds: Minimum 3 peers must buy a code for it to appear on the Push List.
- Season-Aware Banding: Peer Net and Peer Count signals are filtered by the specific fiscal months selected in the UI (e.g., if Apr-Jun is selected, signals only reflect Apr-Jun peer activity).

### 2. Discount Logic (K4)

- MRP Discount Formula:  $\text{sum}(\text{disc\_net}) / \text{sum}(\text{net})$  where  $\text{disc} = 1 - (\text{net} / (\text{mrp\_qty}))$ .
- Secondary Reconciliation (Population Gate): The Secondary Register Discount is only shown if  $\geq 99\%$  of lines in the source sheet satisfy:  $\text{abs}(\text{gross} * (1 - \text{disc\_pct}/100) - \text{net}) < 1$ . If failed, the measure is blocked.
- Project Exclusion: A "Customer Bridge" is used for FYs without head\_canon data. Customers ever attributed to the project channel in any attributed FY (23-24, 26-27) are excluded from "Territory" views.

### 3. Seasonality & Trends

- Seasonality Basis: Computed over All Channels (Project + Territory) using pooled data from closed FYs.
- Consistency: A segment is marked "Consistent" if the Peak Month is the same across all 3 closed FYs.
- Breadth Trend: Dropped Value = sum of prior-FY net for codes NOT bought in the current FY by a customer who is still active.

### 4. Blocked Measures

- Margin per Code: Blocked if cost\_master is empty or unverified. MRP discount is explicitly NOT treated as margin.
- Live Year Retailer: Secondary SKU facts are blocked for FY2026-27 as register data is not yet backfilled.
